ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS PAGE IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1X

1. The Central Meteorological Institute (Institutul Meteorologic Central) which is under the control of the Ministry of Communications, is situated in the Parcul Carol district of Bucharest, behind the Military Museum and between it and Strada Cutitul de Argint. A branch meteorological station is located at Baneasa airport. Other branch stations are located throughout Rumania.
2. The largest field radio station of the Institute is located on Boulevardul Domnita Ileana, in Constanta. Radio equipment of this station consists of one 300-watt short-wave transmitter manufactured by Standard, and one or two German-made 50-watt short-wave transmitters.
3. Approximately seven to eight radio operators are employed by this Constanta station. The chief operator is one Stefanescu, who has held this assignment for many years.
4. The Constanta station transmits and receives meteorological bulletins during the entire twenty-four hour period. A complete official meteorological bulletin is transmitted daily at 6:50 a.m. and 12:50 p.m. GMT. This bulletin is telephoned to the Coastal Radio Station for transmission to ships and sea on the medium wave-lengths worked with Soviettransport vessels by the Coastal Station.
5. A second meteorological station at Constanta is located at the radio beacon (Radio FAR), on the grounds of the Coastal Radio Station. This station has no radio equipment. Its meteorological readings are sent to Bucharest by mail and not collated with the other Constanta station. The chief of this station was Filip Goslar.
